## ON BOARD SERVICES (INSPECTION & REPAIRING)

On-Board Services (Inspection & Repairing) refer to specialized services provided directly on vessels to ensure their operational integrity, safety, and compliance with maritime regulations. These services are performed while the vessel is docked, anchored, or en route.

### ■ Inspection Services

- Hull Inspections: Checking for damage, corrosion, or fouling.
- Engine and Machinery Surveys: Assessing engines, pumps, and turbines for wear and tear
- Propeller and Shaft Checks: Ensuring alignment and detecting damage.
- Electrical System Inspections: Testing generators, wiring, and control systems.
- Safety Equipment Audits: Verifying lifeboats, fire extinguishers, and alarms.

### ■ Repair Services

- Mechanical Repairs: Fixing engines, turbochargers, and propulsion systems.
- Electrical Repairs: Troubleshooting and repairing wiring, panels, and sensors.
- Plumbing and Piping Repairs: Addressing leaks, replacing valves, and unclogging pipes.
- Deck Equipment Repairs: Servicing winches, cranes, and mooring systems.

### ■ Specialized Services

- Underwater Repairs: Using divers or ROVs to fix propellers, rudders, or hull damage.
- Calibration and Alignment: Precision work for engines, shafts, and navigation equipment.
- Coating and Painting: Anti-fouling and rust-proofing applications.
- Emergency Repairs: Rapid fixes for critical issues to minimize downtime.

### ■ Benefits of On-Board Services:

- Minimized Downtime: Repairs and inspections are performed without significant disruption to operations.
- Cost-Effective: Reduces the need for drydocking.
- Compliance Assurance: Ensures adherence to maritime safety and environmental standards.
- Enhanced Safety: Identifies potential issues before they escalate.
